

Senior fullstack JavaScript developer with 8+ years of experience and a deep focus on front-end architecture, design systems, and delivering fast, resilient user experiences. I've helped startups and scale-ups turn complex product visions into scalable, maintainable interfaces across React, Next.js, and React Native. I bring a product-oriented mindset with strong AI integration skills, from LLM-powered platforms to intelligent workflow automation. Ecole 42 alumni, bilingual French/English, fully autonomous from concept to production.

EXPERIENCE

Lead Frontend Developer - Junea

Nov 2025 - Present

Next.js 16, React 19, TypeScript, NextAuth, TanStack Query, Tiptap, Recharts, Drizzle ORM, Monorepo

SaaS platform for wedding planning: admin dashboard, guest CRM, RSVP builder, customizable wedding websites, seating planner, and gift registry.

- Architected the full database layer and admin panel from day one, building a monorepo with shared packages
- Built a complete guest CRM with bulk actions, in-cell editing, sticky columns, and real-time stats
- Developed a drag-and-drop wedding website builder with live preview, theme customization, and autosave
- Implemented RSVP system with password protection, plus-one handling, custom fields, and email notifications
- Designed the auth flow (register, login, password reset) with NextAuth, matching pixel-perfect Figma specs
- Created a database-backed todo sidebar with CRUD operations and due date picker
- 370+ commits, 37+ feature commits in 4 months

Lead Frontend Developer - Coincidence Labs (Misogi Labs)

2025 - Present

React, TypeScript, AI-driven UI, Data Visualization, SPA, Responsive Design

AI copilot platform for pharma R&D, helping medicinal chemists accelerate drug discovery through multi-parameter optimization and AI-driven insights. San Francisco-based startup backed by Axel Springer Porsche and California Life Sciences.

- Sole frontend developer responsible for the entire user interface of the AI platform
- Built the complete landing page and product marketing site from scratch
- Designed and implemented complex data visualization dashboards for molecular analysis workflows
- Developed the multi-agent AI coordination interface enabling cross-team collaboration between chemists, pharmacologists, and computational scientists
- Created responsive, accessible UI for complex scientific data with patent/document exploration features

Lead Frontend Developer (Web JS) - Jimini AI

2024 - 2025

Next.js, TypeScript, WebSocket, Python, Drizzle, Zod, Auth0, SST, Jest, Docker, GitHub Actions

Cloud-native LLM platform for legal professionals enabling rapid document analysis and AI-assisted research.

- Built a high-performance frontend enabling rapid adoption for legal teams handling 10K+ requests/day
- Engineered an AI-powered document embedding and chat system, cutting legal research time by 60%
- Integrated robust Auth0-based authentication with multi-role architecture, reducing unauthorized access by 42%
- Automated CI/CD via GitHub Actions and CronJobs, ensuring production deployments in under 3 minutes
